

Dallas College Radiologic Science Students Volunteer to Help Launch Annual Christmas Faire

Mesquite, TX, December 12, 2025 — As Sharing Life prepares for its beloved Annual Christmas Faire taking place December 17-18, hundreds of children across North Texas are one step closer to a brighter holiday thanks to the helping hands of Dallas College Radiologic Sciences students who volunteer each year to kick off the event.

On Monday, Dallas College students will be on site assisting with the first day of set-up for the Christmas Faire, transforming Sharing Life's food pantry and clothing closet into a giant toy store ready to welcome families in need. Their efforts help make possible an event that will serve 1,000 children and brighten their spirits during the holiday season.

This annual cornerstone holiday tradition brings dignity, joy, and hope to families facing hardship. Through partnerships with WFAA Santa's Helpers, Marine Corps Toys for Tots, Santa Cops, and generous community donors, children receive new toys, stuffed animals, blankets, hoodies, stockings, and stocking stuffers, allowing parents to provide Christmas for their children during challenging times.

"Christmas is our favorite time of year at Sharing Life," said Teresa Jackson, CEO and Founder. "The Christmas Faire is about more than gifts, it's about restoring joy, easing stress for parents, and reminding families that their community cares. Seeing students give their time to help other children experience Christmas makes this event even more meaningful."

To make the Christmas Faire possible, Sharing Life relies on toy drives, monetary donations, and volunteers throughout the year. As preparations begin, the organization continues to welcome community support to ensure every child served feels celebrated and valued.

Sharing Life Community Outreach, Inc. is a North Texas nonprofit founded in 1999 that strives to end hunger and poverty by demonstrating compassion through food, clothing, financial resources, and educational programs.
